Remarks concerning the Lifting Capacities

Lifting Capacities = Actual Load + Snatch
Block + Auxilary Equipment.
The Lifting capacities are valid for even and
stable ground.

DIN : The Lifting Capacities do not exceed
75%of the tipping load. They correspond to
DIN 1509.2 (Test load) = 1,25 x Hoist load
+ 0.1 x Jib-own weight, reduce on the Jib
Head)

**We reserve the right to modify the
construction, the technical data as well
as the weights and dimensions.**
